

ROBINHOOD CHAIN

HOODGEM

WHITEPAPER v3.1

Every chain has hidden gems. We are The Hood's.

HUNT. DISCOVER. HODL.

hoodgem.io | \$HGEM

Executive Summary

HoodGem (HGEM) is a community-driven token created on Robinhood Chain. It combines a transparent on-chain launch with a recognizable narrative built around Gemmy - an explorer searching for hidden gems throughout The Hood.

The project is designed around three simple ideas: clear public information, long-term commitment, and a community that grows through participation rather than promises.

TRANSPARENT

Verifiable contract, public liquidity position, and visible project links.

LONG-TERM

Initial liquidity locked through July 17, 2033.

COMMUNITY-FIRST

A story, mascot, and ecosystem designed to grow with holders.

The Story of Gemmy

MORE THAN A MASCOT

Gemmy is the face of HoodGem and the central character in an ongoing adventure. Each chapter follows his search through maps, hidden passages, traps, and mysterious chambers.

The story gives the community something recognizable to follow while reinforcing the project's central idea: the most valuable discoveries are often hidden beneath the surface.

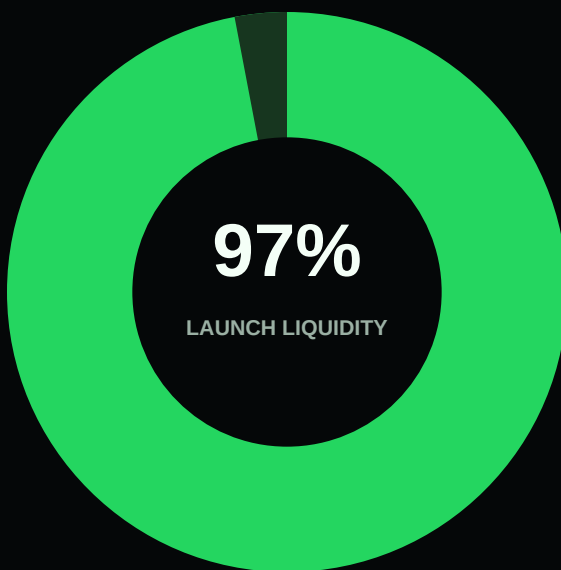

"Every map points somewhere..."

THE REAL CHALLENGE IS FINDING THE GEM.

Tokenomics

1,000,000,000

FIXED TOTAL SUPPLY OF HGEM

97%

Initial ETH/HGEM liquidity

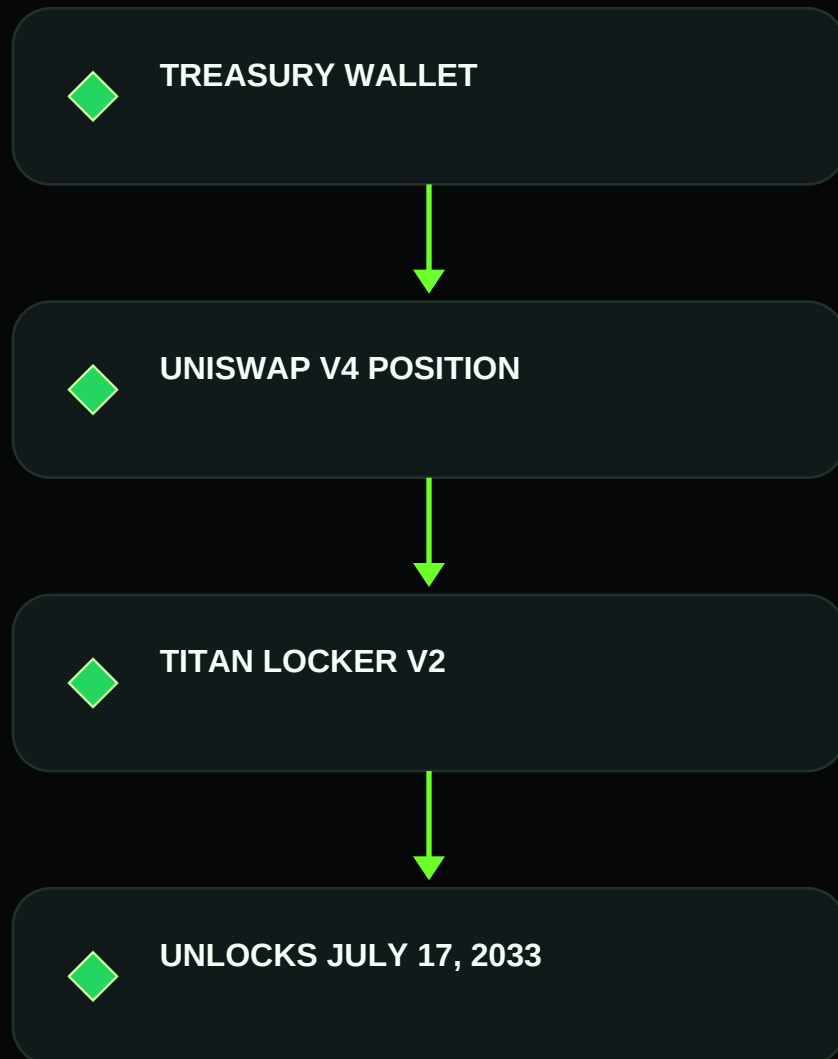

3%

Project treasury allocation

No separate presale allocation, private investor round, or scheduled token unlocks are described in this document. Treasury assets and on-chain activity remain publicly observable.

Liquidity & Security

Locking the position prevents withdrawal of the underlying liquidity before the stated unlock date. Trading fees may still be collected by the designated lock owner while principal liquidity remains locked.

Project Principles

01

Transparency

Key project details should be simple to find and independently verifiable on-chain.

02

Consistency

HoodGem branding, communication, and development should remain recognizable over time.

03

Participation

The community helps shape the project through attention, creativity, discussion, and contribution.

04

Responsible Growth

Growth should come from real interest and continued execution, not guaranteed-return claims.

Roadmap

COMPLETE

Launch token and create ETH/HGEM market

COMPLETE

Verify contract and publish project website

COMPLETE

Lock launch liquidity through July 2033

ACTIVE

Expand discovery through DexScreener and social channels

NEXT

Pursue CoinGecko and CoinMarketCap visibility

FUTURE

Develop community-led initiatives and responsible utility

Roadmap items are directional goals, not guarantees. Priorities may change as the ecosystem, market, and community develop.

Risk Disclosure

- **Market Risk**

Digital assets can experience extreme price volatility and may lose substantial or all value.

- **Liquidity Risk**

Available liquidity and execution prices can change quickly, especially during periods of heavy buying or selling.

- **Technology Risk**

Smart contracts, wallets, interfaces, bridges, and networks may experience bugs, outages, exploits, or user error.

- **Regulatory Risk**

Laws and regulations affecting digital assets may change and can differ by jurisdiction.

- **No Guarantee**

Nothing in this document guarantees adoption, exchange listings, utility, returns, or future project development.

This whitepaper is provided for informational purposes only and does not constitute financial, legal, tax, or investment advice. Readers should conduct their own research and assess their own risk tolerance.

EVERY CHAIN HAS HIDDEN GEMS.
